Exchange Policy

Customer Support Knowledge Base

Purpose

This policy explains how customers can request an exchange for an eligible item. The guidance below is a sample policy for a demonstration ecommerce support chatbot.

Eligibility

Items may be exchanged when they are unused, unwashed, undamaged, and returned with original tags and packaging.

An exchange request should generally be submitted within 7 days of delivery. Some product categories may have different conditions or may be non-exchangeable.

Products marked final sale, personalized items, and hygiene-sensitive products may not qualify for exchange.

How to request an exchange

1. Sign in to the account used for the purchase and open Order History.

2. Select the order and item, then choose Exchange (if available).

3. Select the reason and preferred replacement size, color, or variant.

4. Follow the return or pickup instructions provided. Keep the exchange reference number until the request is completed.

Exchange processing

The replacement is subject to stock availability. If the requested variant is unavailable, customer support may offer another option or a refund according to the applicable policy.

After the returned item passes inspection, the replacement is typically dispatched within 3–5 business days. Delivery time depends on the destination.

Shipping and fees

For defective, damaged, or incorrectly shipped items, the seller covers eligible exchange shipping costs.

For exchanges due to preference, size, or color, shipping fees may apply. Any fee should be shown before the request is confirmed.

Need help?

Contact customer support with the order number, item name, and exchange request reference. Do not share passwords or full payment-card details.
