Orders & Account Help

Customer Support Knowledge Base

Track an order

Open Order History in your account and select the order to view its current status and tracking link.

Tracking may take up to 24–48 hours to show movement after a shipping confirmation is sent.

Order status definitions

Placed: the order was received.

Processing: payment and order details are being verified and the package is being prepared.

Shipped: the carrier has collected the package; tracking is available when provided by the carrier.

Delivered: the carrier reports that the package was delivered.

Cancelled: the order will not be shipped. Eligible refunds are initiated according to the refund policy.

Change or cancel an order

Address, item, and cancellation changes may be possible only before the order enters packing or shipment.

If the order is already shipped, use the applicable return or exchange process after delivery. Contact support promptly with your order number if you need help.

Account access

Use the Forgot Password option on the sign-in page to receive a password reset link.

If you no longer have access to your registered email address, contact support for account-recovery assistance. Support may request reasonable verification of account ownership.

Missing delivery

Check the carrier tracking page, delivery photo or proof of delivery (if available), and nearby reception areas or household members.

If the package is still missing, contact support with the order number and tracking ID.

Privacy and security

Never share your password, one-time passcode, or complete payment-card details with anyone claiming to be support.

Demo knowledge-base content — replace with your store's approved policies before production use.
