Payment & Refund Policy

Customer Support Knowledge Base

Payment methods

Available payment methods are displayed at checkout and may vary by region. An order is confirmed only after the payment process is completed or an approved payment-on-delivery option is selected.

Payment issues

If a payment appears to fail but the amount is debited, check with your bank or payment provider. Temporary authorization holds may be reversed automatically.

Avoid placing repeated orders while a payment is pending. Contact support with the order number and transaction reference; do not send full card details or OTPs.

Refund eligibility

Refunds may be available for eligible cancellations, approved returns, damaged or incorrect items, or orders that cannot be fulfilled.

The item may need to be received and inspected before a return refund is approved. The applicable product and return terms determine eligibility.

Refund timeline

Once approved, refunds are generally initiated within 5–7 business days. The time for the funds to appear depends on the bank, card issuer, or payment provider.

For payment-on-delivery orders, the customer may be asked to provide verified bank or payment details through a secure official channel.

Refund status

Check the order details or refund confirmation message for status and reference information.

If the stated processing window has passed, contact support with the order number and refund reference.

Promotions and partial refunds

Discounts, coupons, shipping charges, and partial returns can affect the final refund amount. The amount confirmed during refund processing is authoritative.
