Shipping & Delivery

Customer Support Knowledge Base

Processing and dispatch

Orders are typically processed within 1–2 business days. Processing may take longer during holidays, promotions, or periods of unusually high demand.

A shipping confirmation is sent after the parcel is handed to the carrier.

Estimated delivery

Estimated delivery dates are shown at checkout or in the order details. Delivery estimates are not guarantees and may change due to carrier operations, weather, or local conditions.

Tracking

Use the tracking link in the shipping confirmation or in Order History.

Carrier tracking may not update immediately after dispatch. Allow 24–48 hours for the first scan to appear.

Shipping charges

Any shipping fee is displayed at checkout before the order is placed. Free-shipping offers may have eligibility conditions such as minimum order value or location.

Delivery attempts

The carrier may contact the customer or make additional delivery attempts according to its procedures.

If delivery fails because the address is incomplete or the recipient is unavailable, check tracking and contact support for available options.

Address changes

Address changes may be possible only before dispatch. Once the parcel is with the carrier, changes depend on carrier capabilities and may not be available.

Delayed, lost, or damaged shipments

For a shipment that is significantly delayed or appears lost, contact support with the order number and tracking ID.

If a package arrives visibly damaged, document the condition and contact support promptly.
